

- in every class, there are 3 members
 - variables
 - methods
 - class.
- we can define accessibility of any class members by using access modifiers
- there are 4 scopes to define accessibility
 - inside class
 - inside package (coll' of classes & interfaces)
 - outside of package
 - outside of package using inheritance

There are 4 access modifiers

access modifier	inside class	inside package	outside package	outside a package using "inheritance"
private	✓	✗	✗	✗
default	✓	✓	✗	✗
protected	✓	✓	✗	✓
public	✓	✓	✓	✓
